Proposal for calculation

Single regional input-output for Sweden:

- Now cast single regional EEIO for T-1 with following:
    - Macroeconomic aggregates for T-1
    - Production index for T-1
    - Preliminary GHG for T-1
    - Intermediate demand for T-2
    - RAS balancing

Multiregional input-output for Sweden's imports for T-1:

- EXIOBASE for T-1

OR

- FIGARO for T-2 with:
    - EXIOBASE GHG emissions

- Experiences that members have had with using the data and methods referred to, and data and methods that have not been included in the survey

- Reflections on barriers and drivers for the production of statistics on environmental pressures from a consumption perspective in your country

- Relevance on the relevance of statistics on environmental pressures from a consumption perspective for policy makers in respective countries
