01

INTRODUCTION

LINKING SEEA TO NATIONAL DEVELOPMENT AGENDA

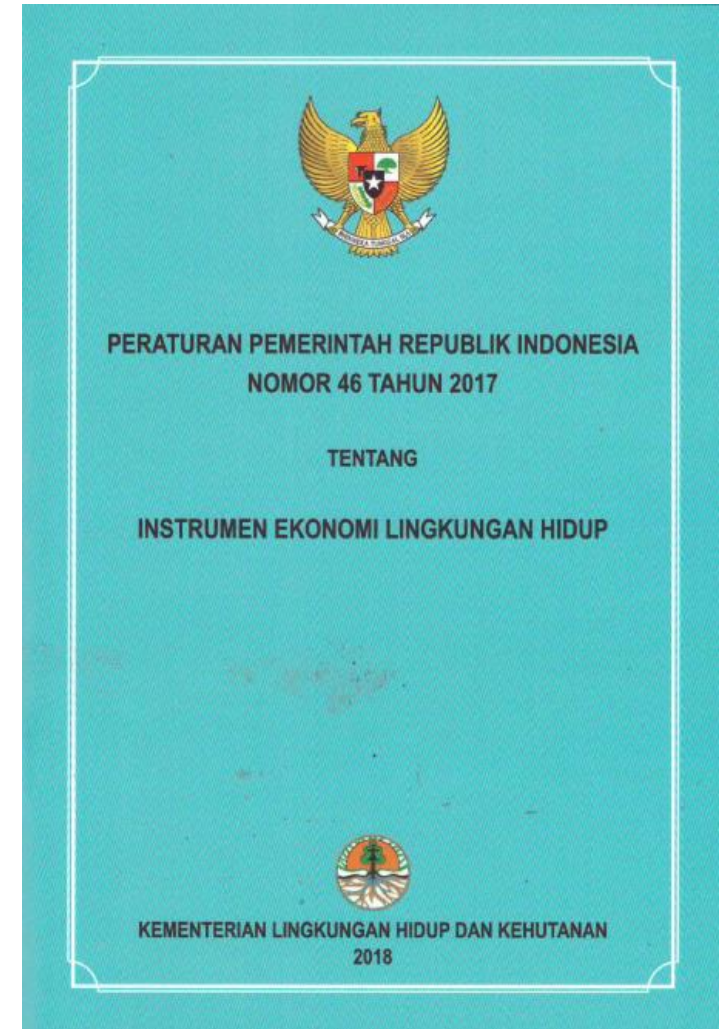

7 National Development Agenda in RPJMN 2020-2024

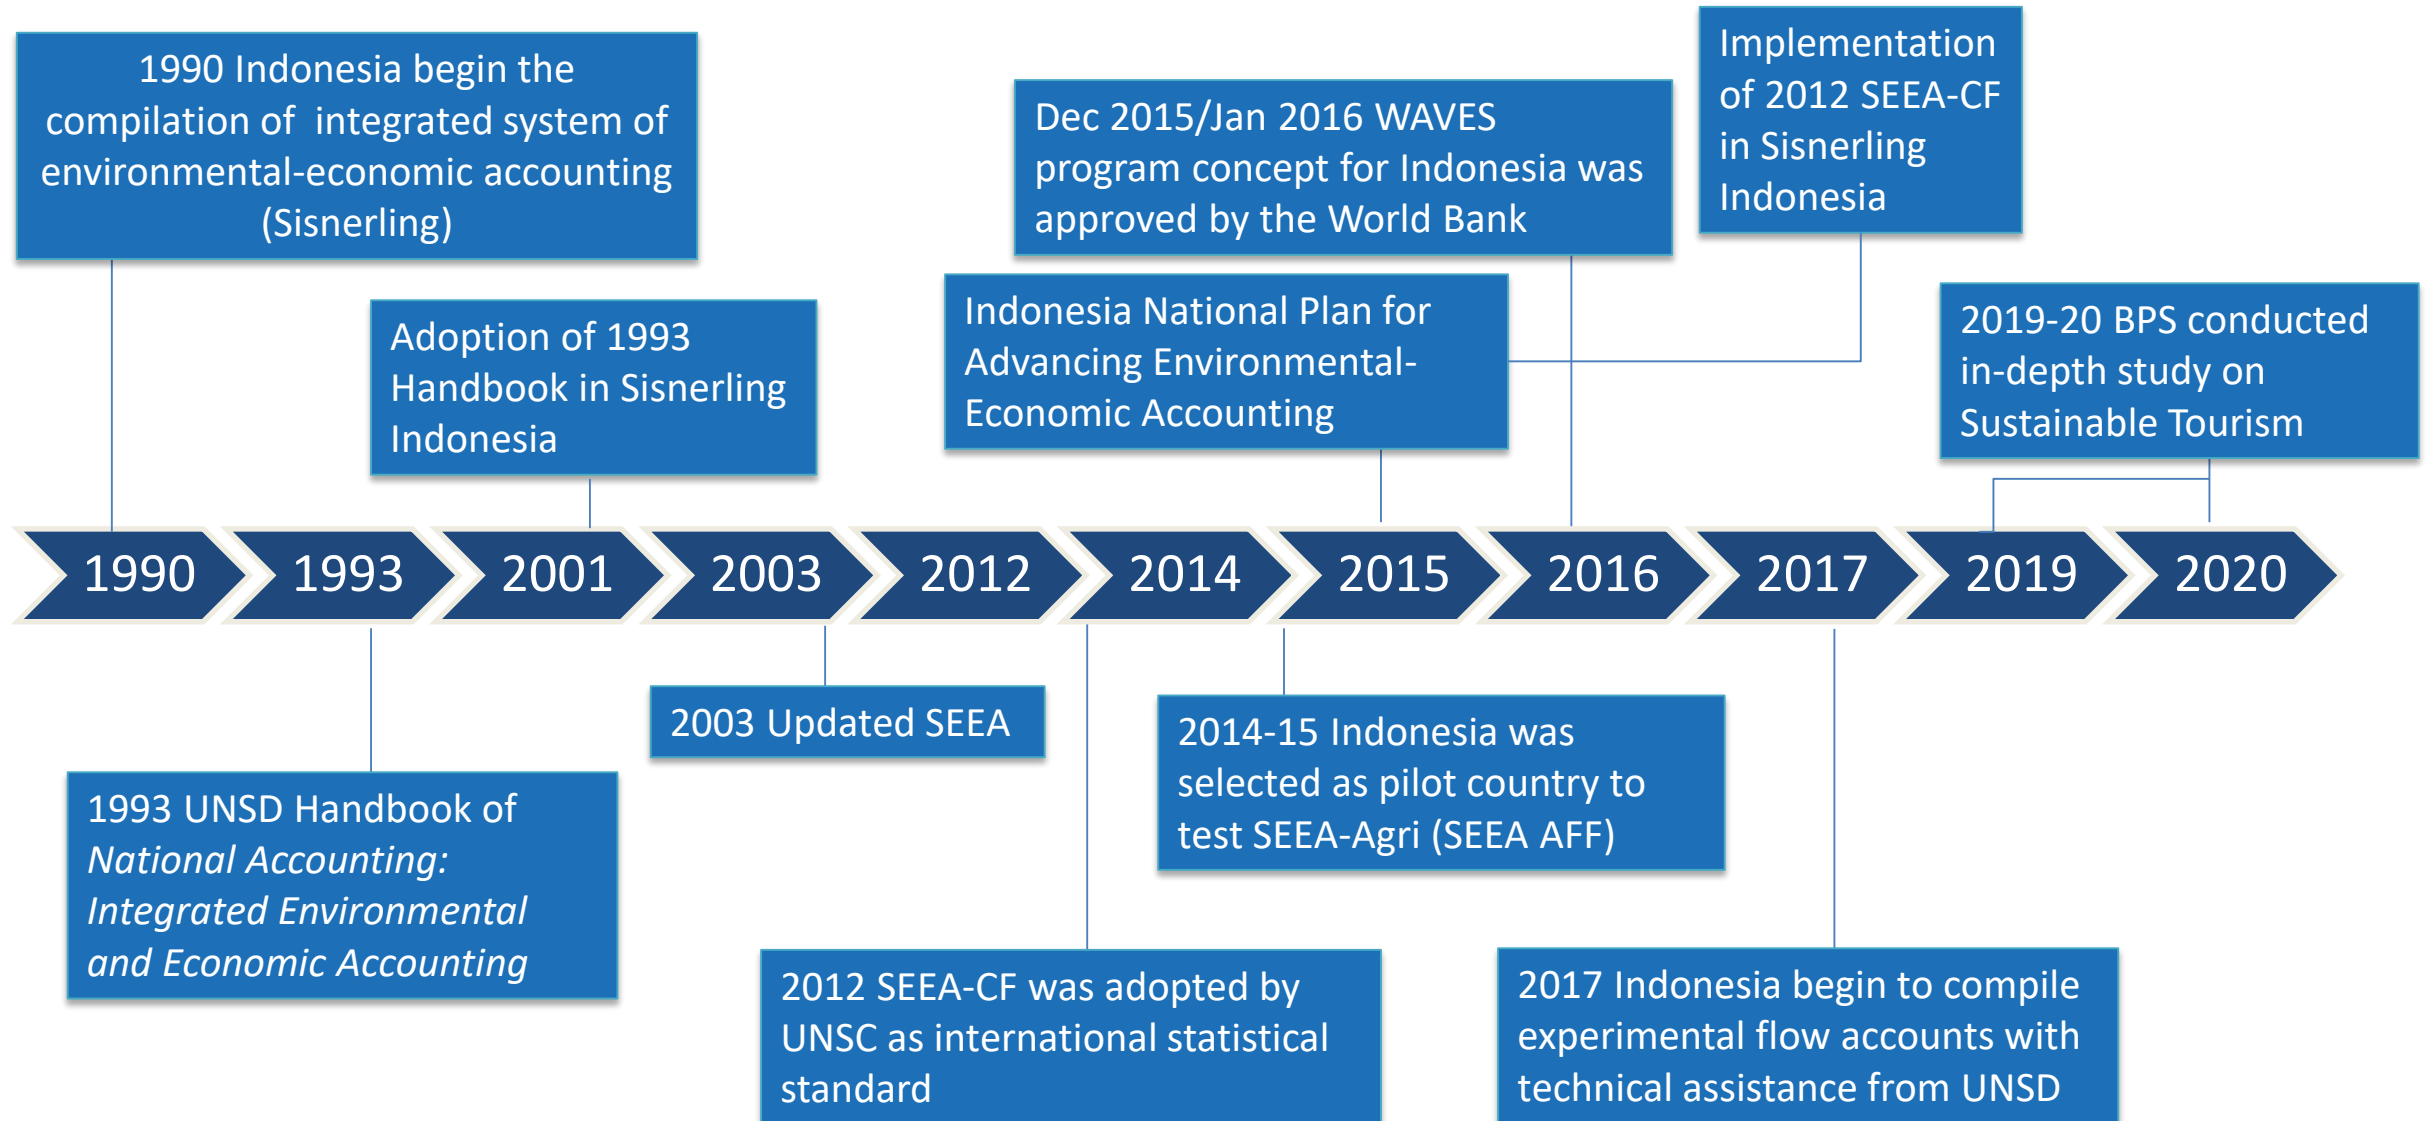

National development needs to pay attention to the carrying capacity of natural resources and the carrying capacity of the environment, disaster vulnerability and climate change.

- Republic Indonesia Law No 16/ 1997 on Statistics
- Regulation of BPS-Chief of Statistician No 7/ 2008 on the Organisation and Structure of BPS-Statistics Indonesia
- Regulation of BPS-Chief of Statistician No 1 /2009 on Job Description of the BPS-Statistics Indonesia
- **Republic of Indonesia Government Regulation No 46/ 2017 on the Environmental Economics Instruments**

THE STORY OF SEEA IN INDONESIA

SISNERLING INDONESIA

SISNERLING – Sistem Terintegrasi Neraca Ekonomi dan Lingkungan

is one of BPS publications aimed to describe the impacts of economic development on the availability of natural resources and the roles of natural resources in economic activities.

02

PLAN AND ROADMAP

PHASE OF SEEA IMPLEMENTATION

PHASE 1:

- Ownership and institutionalization
- Policy Issues
- Prioritized account
- Current initiatives

PHASE 2:

- Data availability
- Data gap analysis
- Capacity Building
- Socialization

PHASE 3:

- Drafting strategic plan to compile environmental account

PHASE 4:

- Implementation

INDONESIA NATIONAL PLAN TO IMPLEMENT SEEA

Participation	Enabling factors	Activities	Outputs	Impacts	Outcomes
<p>Core members: Ministry of Planning (BAPPENAS)</p> <p>Statistics Indonesia (BPS)</p> <p>Ministry of Finance (MenKeu)</p> <p>Ministry of Environment (KLH)</p> <p>(Not yet engaged):</p> <ul style="list-style-type: none"> - Ministry of Agriculture - Ministry of Forestry - LAPAN, BPPT, BIG, BKPRN - Ministry of Marine Affairs and Fisheries - Others: Bureau of Logistics, Ministry of Foreign Affairs (DepLu) - Universities - NGOs - Civil society 	<p>SEEA Steering Committee</p> <ul style="list-style-type: none"> - Governance structure - Technical working groups <p>Training and capacity development</p> <p>Access to data</p> <p>Funding</p> <p>Coordination with related national and international activities</p> <p>Funding proposals</p> <p>Implementation plan</p> <p>Access to external expertise</p> <p>A common geospatial infrastructure and other statistical infrastructure</p> <p>Statistical standards</p>	<p>Building priority ecosystem accounts:</p> <ul style="list-style-type: none"> - Data inventory - Data exchange - Data quality assessments - Data development (integration) - Application of common concepts, classifications and standards - Transformation of data into accounting structure - Research on ecosystem services and well-being <p>Capacity building: Human resources</p> <ul style="list-style-type: none"> - Training and capacity building (workshops and courses) - Awareness-building, communications and outreach <p>Capacity building: Infrastructure</p> <ul style="list-style-type: none"> - Development of common spatial infrastructure - Determination of common statistical standards <p>Statistical management</p> <ul style="list-style-type: none"> - Project planning and evaluation 	<p>Land accounts (including, forest, agriculture and ownership)</p> <p>Water asset, supply and use accounts</p> <p>Carbon stock, supply and use accounts</p> <p>Ecosystem service accounts (flood protection)</p> <p>Economic aggregates: Adjusted Net Savings</p> <p>Optional:</p> <ul style="list-style-type: none"> - Ecosystem condition accounts - Biodiversity accounts - Other ecosystem service accounts - Case studies on ecosystem services and well-being <p>- Publications on accounts and derived indicators</p> <p>- A comprehensive shared national set of environmental-economic accounting information</p> <p>- Publicly-available environmental-economic data</p>	<p>Mainstreaming of environmental-economic accounts into planning and decision making</p> <ul style="list-style-type: none"> - providing ministers and their agencies with empirical evidence of changes resulting from sustainable development policies - Integrated indicators on sustainable development - a civil service and civil society that is informed about environment and development - improved knowledge on ecosystems and well-being - improved statistical collaboration between sectors and agencies - better policies, decisions on trade-offs between development and conservation 	<p>A comprehensive set of environmental-economic accounting information</p> <p>Enhanced institutional coordination within Indonesia</p> <p>Improved data infrastructure</p> <p>Increased awareness and technical capacity</p> <p>Enhanced coordination of support from international and donor agencies</p> <p>Stronger links with existing platforms for sustainable development and green economy</p> <p>A more integrated, effective and sustainable National Statistical System</p>

Land Account Indonesia: Building On Existing Initiatives

The One Map program	It is essential for the NP-AEEA project, because it will lead to an accurate map of land cover as a basis for ecosystem accounting.
The Indonesian REDD+ program	It is relevant for the NP-AEEA project, because it will lead to up-to-date information on forest cover and status and carbon stocks. At the same time, the NP-AEEA project could inform the REDD+ program on co-benefits of REDD+ projects. This is a main issue in the design of REDD+ projects, since it would enhance the economic justification of these projects.
Gazetting Forest Lands	NP-AEEA project can benefit from this program by obtaining information on forest lands and forest uses. It can also contribute coherent land data to support the development of land reform.
The Green Economy Program	This program highlights the need for the NP-AEEA as a tool for policy makers to monitor progress to green development and as a source of data on land use
Other Programs	Etc.

BUILDING PARTNERSHIP AMONG MULTI-STAKEHOLDERS

8 DECENT WORK AND ECONOMIC GROWTH

GOAL 8

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

President's Vision

National Development Goals

Sectoral Plan and Strategies

- Water
- Energy
- Agriculture
- Marine & Fisheries
- Climate Change
- Education
- Tourism
- Forestry
- Disaster Mitigation
- Rural Development
- Health
- Biodiversity

Other Ministries

- Monitoring and Evaluation
- Integrated Approach

MAIN ISSUES AND CHALLENGES

Commitment from ministries that environmental-economic accounts is important for policy-making

Development of environmental-economic accounts is comply with international standard in support of SDGs

Active collaboration

The need of environmental-economic accounts for policy

LESSON LEARNED

Build partnership with key stakeholders to gain access to sectoral data (tabular and spatial)

Intensify the socialization of the results obtained with policy makers

Need to make operational manual for each account compiled (draft manual)

Use various international initiatives to help SEEA implementation and improvement of Sisnerling

COMMUNICATING AND BUILDING AWARENESS WITH RELEVANT STAKEHOLDERS

A comprehensive environmental-economic accounting information system.

- Address national policy priorities on sustainable development and green economy.

Enhanced institutional coordination within Indonesia and between levels of government and initiatives.

- high-level steering committee as an umbrella coordinating mechanism for SEEA, WAVES and SEEA-Agri

Training and capacity building in environmental-economic accounting.

- provide not only basic understanding of the concepts, but also to engage specialists in professional development through joint activities, staff exchanges and in-depth training on compilation, analysis and valuation.

Enhanced coordination with international and donor agencies.

- could be better coordinated through the SEEA Steering Committee in close collaboration with OneMap and OneData

Addressing challenges of resourcing, data quality, access, technical capacity and statistical infrastructure.

- allocating staff time to pilot projects, data acquisition, data sharing, IT infrastructure development (e.g., data warehouses, collaborative spatial platforms), case studies and research

The development of key aggregate macro-economic statistics.

- collaboration among data providers to obtain the necessary data to produce reliable estimates

Immediately beginning work on priority accounts.

- Land, forest, water, carbon and selected services (especially flood control and carbon storage)

Classification

Indonesia Land Cover Classification (KLHK)

Land cover classification

No.	Kode Klasifikasi	Istilah Bahasa Indonesia	Istilah Bahasa Inggris
(1)	(2)	(3)	(4)
1	2001	Hutan Lahan Kering Primer	<i>Primary dryland forest</i>
2	2002	Hutan Lahan Kering Sekunder	<i>Degraded dryland forest</i>
3	2004	Hutan Mangrove Primer	<i>Primary mangrove</i>
4	2005	Hutan Rawa Primer	<i>Primary peat swamp forest</i>
5	2006	Hutan Tanaman	<i>Plantation forest</i>
6	2007	Semak/ Belukar	<i>Shrub</i>
7	2010	Perkebunan	<i>Perennial crops</i>
8	2012	Pemukiman	<i>Settlement</i>
9	2014	Tanah Terbuka	<i>Bare land</i>
10	3000	Savana/ Padang Rumput	<i>Savana</i>
11	5001	Danau	<i>Water</i>
12	20041	Hutan Mangrove Sekunder	<i>Degraded mangrove</i>
13	20051	Hutan Rawa Sekunder	<i>Degraded peat swamp forest</i>
14	20071	Belukar Rawa	<i>Wetland shrub</i>
15	20091	Pertanian Lahan Kering	<i>Dry cultivation</i>
16	20092	Pertanian Lahan Kering Bercampur Semak	<i>Dry cultivation & shrub</i>
17	20093	Sawah	<i>Rice</i>
18	20094	Tambak	<i>Coastal fish pond</i>
19	20121	Bandara/ Pelabuhan	<i>Airport/seaport</i>
20	20122	Transmigrasi/ Kampung	<i>Transmigration</i>
21	20141	Pertambangan	<i>Mining</i>
22	50011	Rawa	<i>Swamp</i>

LAND ACCOUNTS

CHANGES OF INDONESIA LAND COVER 2015-2019 (THOUSAND HECTARES)

*In the 2015-2019 period, some land cover classes had their area decreased. Those classes were **degraded dryland forest, bare land, dry cultivation, shrub, and dry cultivation & shrub.***

*In contrast, the land cover classes whose area increased in the 2015-2019 period were **perennial crops, primary dryland forest, settlement, degraded peat swamp forest, and plantation forest.***

LAND ACCOUNTS

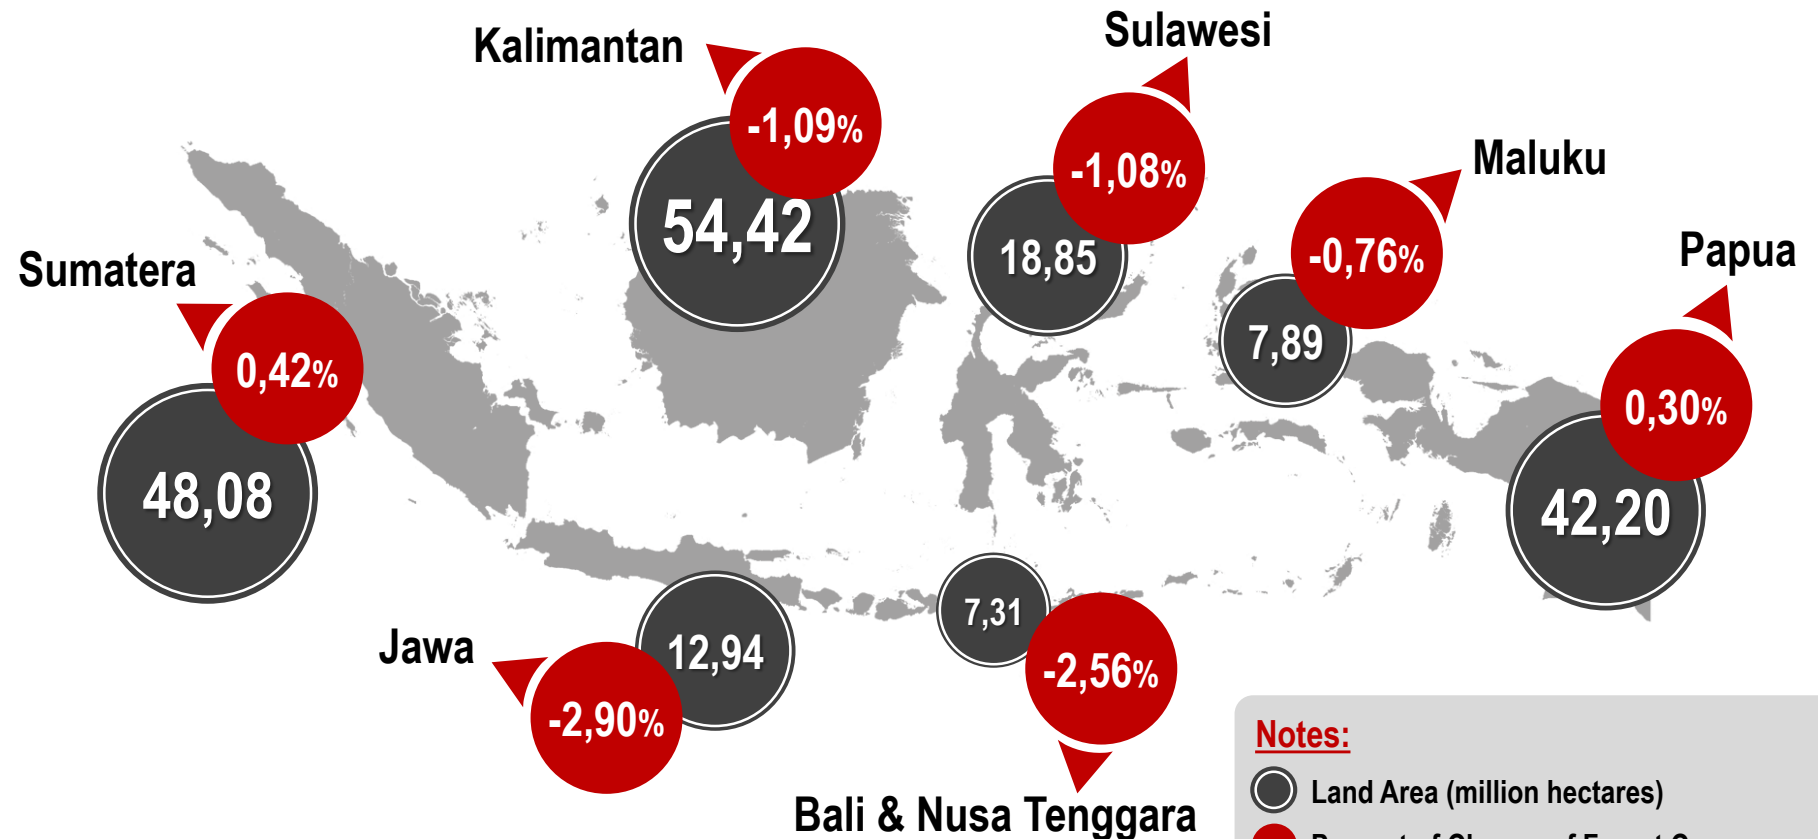

For monitoring the targets of Goal 15 SDGs

Global Indicator : Forest area as a proportion of total land area (15.1.1)

In order to describe forest area as a proportion of total land area, this indicator is approximated by national indicator, i.e. proportion of forest cover to total land area

Island	Percentage of Forest Cover to Land Area (%)	
	2015	2019
Sumatera	27,64	28,06
Jawa	25,18	22,28
Kalimantan	49,90	48,81
Sulawesi	49,57	48,49
Bali-Nusa Tenggara	39,98	37,42
Maluku	64,83	64,07
Papua	80,60	80,90
INDONESIA	49,61	49,04

TIMBER ASSET ACCOUNTS

Stock of Timber Resources in Indonesia (billion m³), 2015-2019

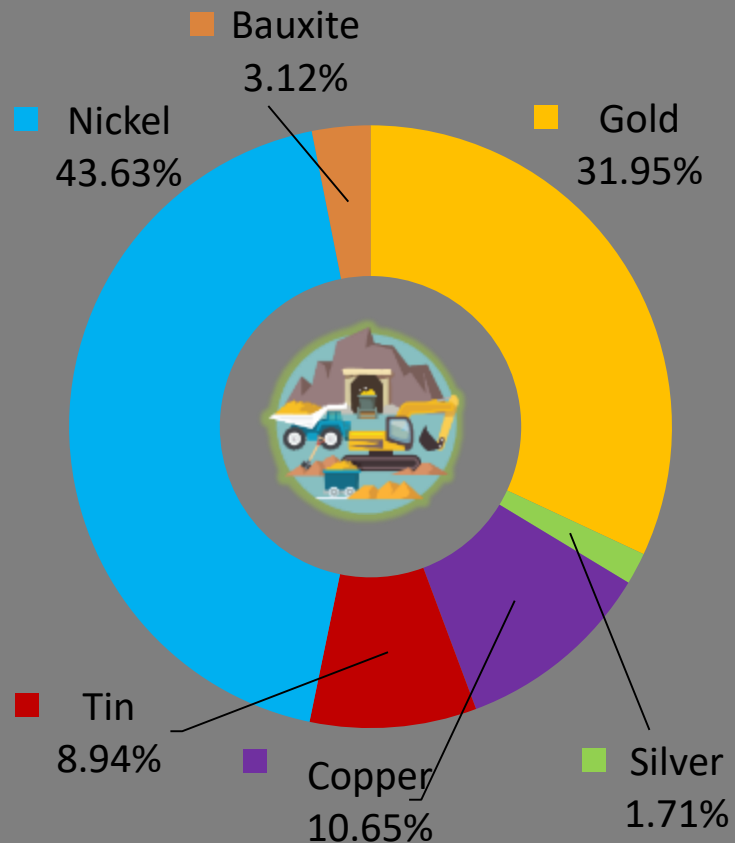

*) preliminary figures

**) very preliminary figures

MONETARY ASSET ACCOUNTS

Percentage of Monetary Value of Indonesia Natural Resources in 2019

Mineral Resources

Energy Resources

Timber Resources

MONETARY ASSET ACCOUNTS

Monetary Value of Stock of Natural Resources in Indonesia

Type of Natural Resources	Monetary Value (trillion IDR)	
	2015	2019
Coal	2.534,79	5.292,64
Natural Gas	2.092,74	1.959,50
Oil	1.128,62	1.303,82
Timber	792,99	990,75
Nickel	151,55	688,83
Gold	311,02	504,34
Copper	172,75	168,08
Tin	50,12	141,19
Bauxite	2,51	49,33
Silver	14,78	26,94
TOTAL	7.251,87	11.125,42

Depletion of Natural Resources in Indonesia (trillion IDR)

ENVIRONMENTALLY ADJUSTED GDP

(GDP ADJ BY DEPLETION)

Net Domestic Product (NDP)-1

NDP 1 is an aggregate resulted from GDP subtracted by consumption of fixed capital and depletion of natural resources.

$$\text{NDP 1} = \text{GDP} - \text{Consumption of fixed capital} - \text{Depletion}$$

Description	Value in 2019 (trillion IDR)
Gross Domestic Product (GDP)	15.833,94
Consumption of Fixed Capital	3.168,10
Net Domestic Product (NDP)	12.665,84
Depletion of Natural Resources	403,80
Depletion-Adjusted NDP (NDP 1)	12.262,04

GDP and NDP-1 of Indonesia, 2015-2019
(trillion IDR)
