No comments on the types of special units presentation, structure of the extent and condition ecosystem accounts.

It is very important to be decided if IUCN Global Ecosystem Typology will be used as referenced classification. In our opinion a clear description is needed for linking /corresponding tables establishment between current classifications used including MAES classification (EUNIS) and Corine Landcover (CLC) classes to IUCN - Global Ecosystem Typology which is biome orientated (larger scale).

Chapters 4 and 5 define common principles and set out a framework for accounting for the extent and condition of ecosystems and their changes over time and we have no additional comments on these Chapters.

Question 4. Do you have comments on Chapters 6-7 of the draft SEEA Ecosystem Accounting?

Overall we agree with the way everything is presented for these Chapters.

Question 5. Do you have comments on Chapters 8-11 of the draft SEEA Ecosystem Accounting?

No comments on Chapters 8-11

Question 6. Do you have comments on Chapters 12-14 of the draft SEEA Ecosystem Accounting?

No comments on Chapters 12-14
