

Project for the Nordic Council of Ministers
(NMR)

Nordic SEEA to supplement GDP and with a discussion on how social data can be incorporated

NMR ad hoc group complementing welfare
measures – ongoing work 2013-2015

Viveka Palm, Nancy Steinbach

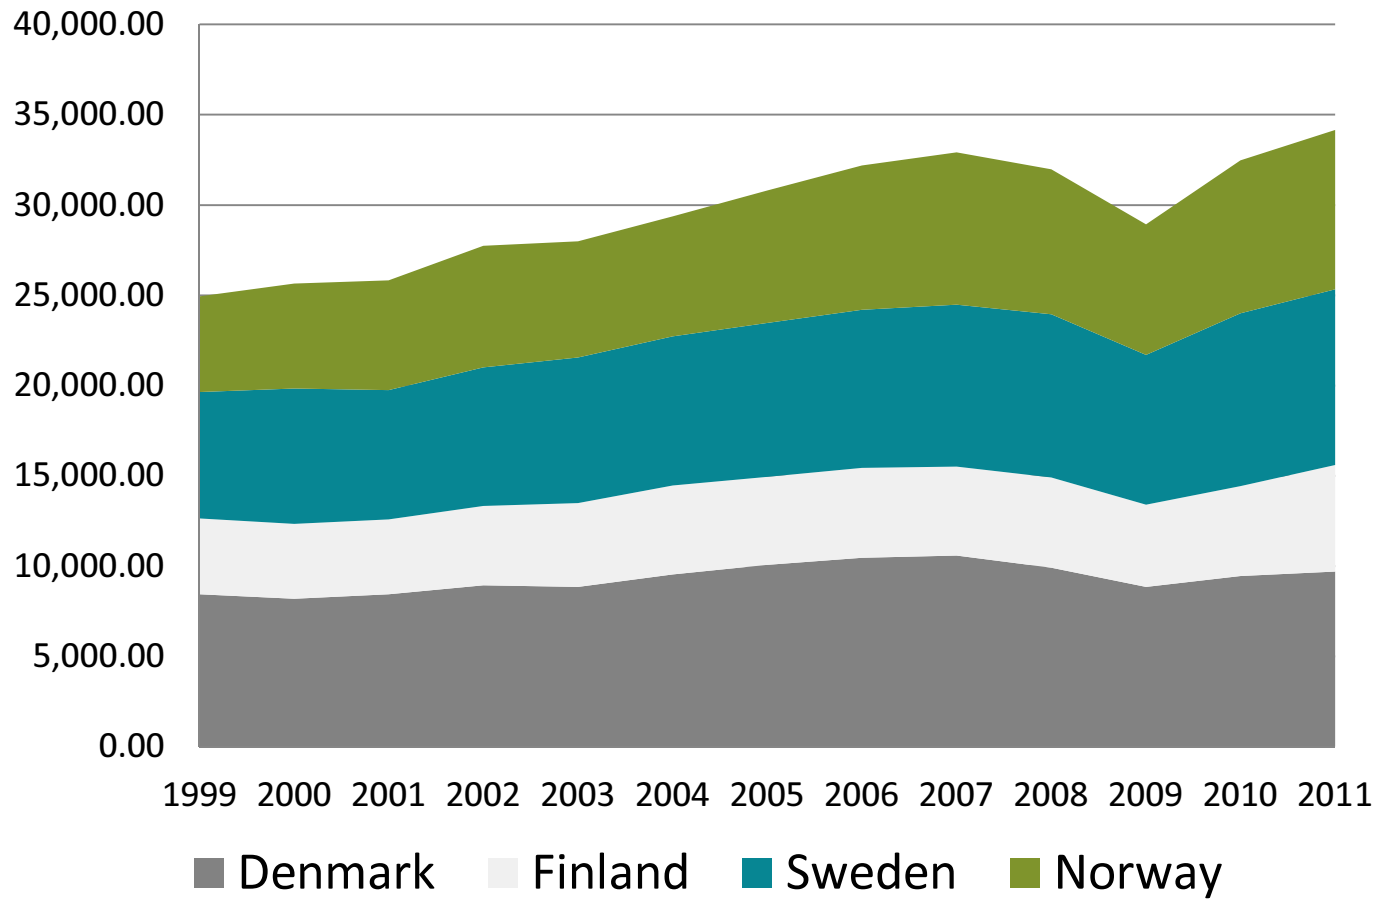

Project initiated by the environmental ministers in the Nordic countries

- Asked for help from statistical offices to increase use of SDI:s
- SDI:s are available for the Nordic countries, but there is a notion that they are under-used. (The sectors are still using their normal data)
- The project has a goal to suggest how the information can be presented to increase use
- The accounts provide data that integrates economic-environmental issues

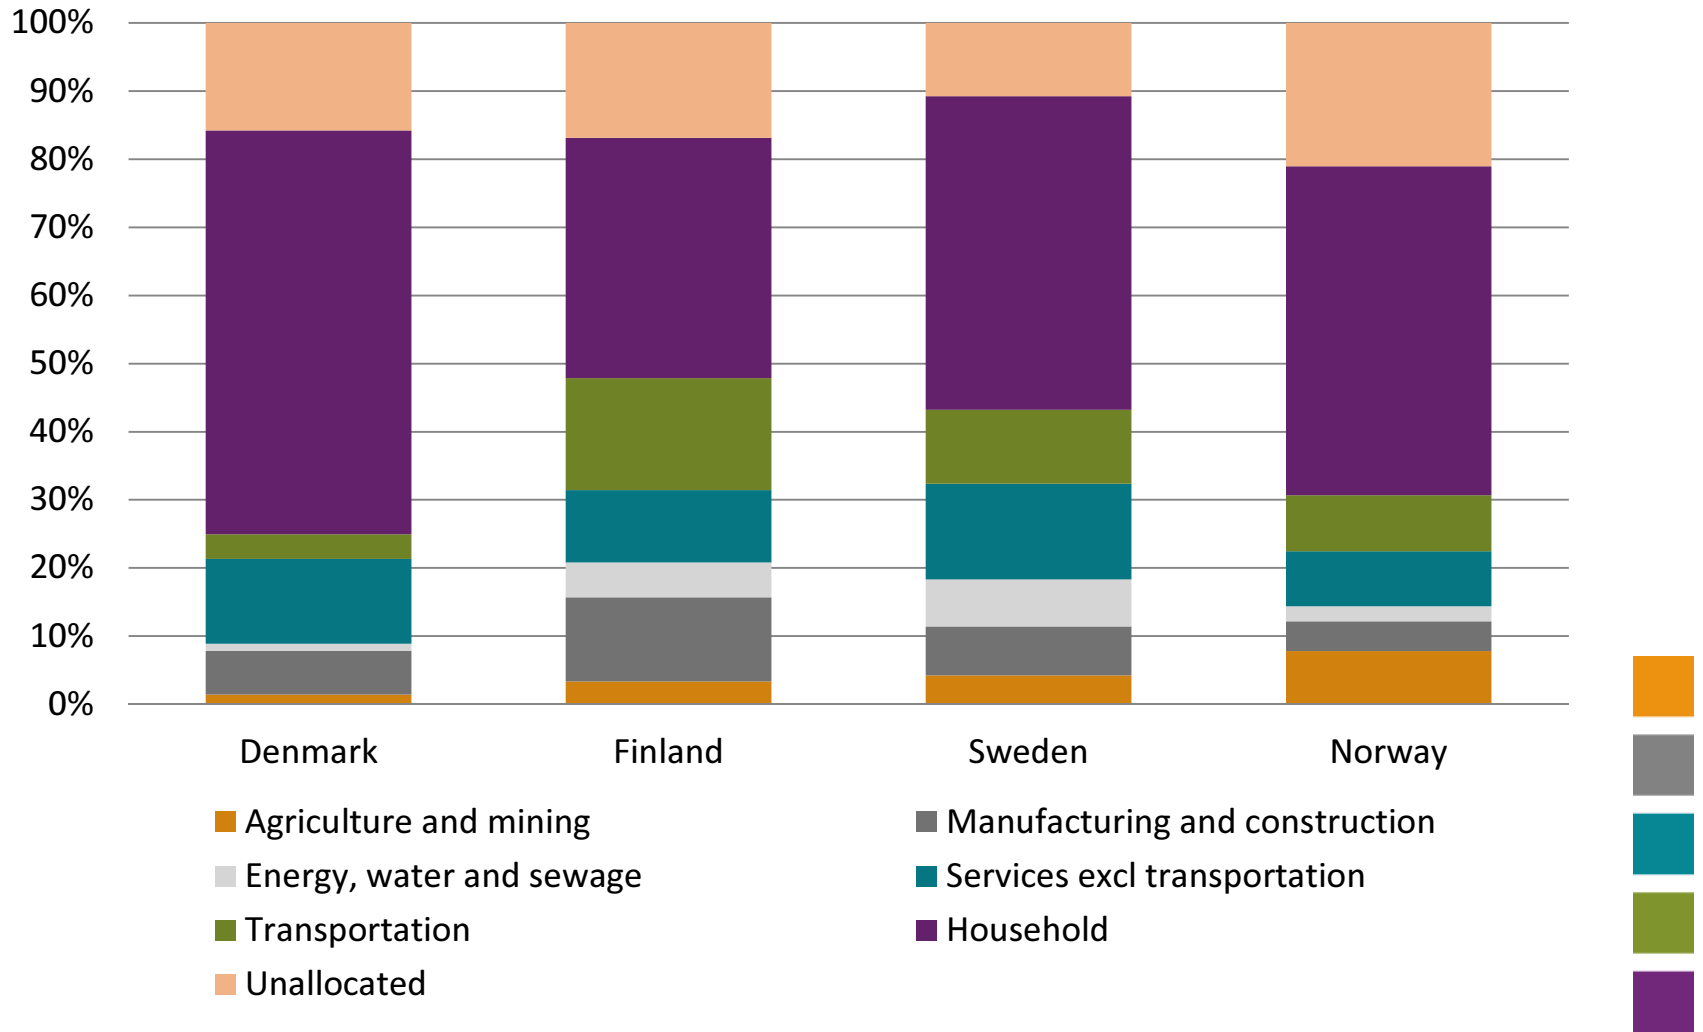

Total environmental taxes per country In mil Euro

Environmental taxes per industry and household

% of total environmental taxes 2008

Test Nordic environmental account e.g. in the Nordic statistical yearbook

- Emissions to air by industry and by consumption
- Environmental economic instruments: taxes and subsidies
- Material flows, Energy use by industry

NMR on Environmental accounts and indicators

Way forward

1. To produce and compare national data, and then discuss the results and models that are being used
2. Report ready autumn 2015
3. High-level meeting planned to discuss the way forward

Statistiska centralbyrån Statistics Sweden
