Session 4: NCA informing policy and governance: sharing news and learning from ‘stories of change’

small group discussion

Marko Javorsek, United Nations Statistics Division

Global NCA Policy Forum, 18-19 November 2019

Kampala, Uganda

United Nations

Discussion questions

1. NCA supply-side question: What **accounts lessons** – about effectively producing accounts and using accounts for landscape decisions – would like to share from your country/organization?
2. Landscape demand-side question: What **decision-making lessons** – about how good decisions are made for landscape management – would you like to share from your country/organization? What is your take-away from the presentations on how accounts can inform landscape management programs? What are the main challenges?
3. Question on connecting supply and demand: What lessons are there about effective **institutional linkages between agencies involved in landscape management and NCA**? What are the main challenges for coordination and how can that be improved?

THANK YOU
