I. CURRENT WATER DATA RESOURCES IN CHINA

Data Publication and Management

bulletins

yearbooks

white books

data collection

survey reports

# I. CURRENT WATER DATA RESOURCES IN CHINA

☔ **Data Uses**

Supporting policy formulation

Intensification of water resources management

Promoting sustainable use of water resources

II. Water Statistics

- **Current Water Related Organizations and Administration**

**MWR
department of water administration
under the State Council**

**administrative agencies
of river basin**

· · ·

**administrative agencies
of region**

II. Water Statistics

Issues

The standardization and efficiency of statistical work need to be improved

The census methods adopted are simple

There is no mechanisms for data exchange and sharing between different governmental departments

Observation and administrative records are lacking at the basic level

III. IMPLEMENTATION OF SEEAW IN CHINA

☔ Progress

Theories and techniques on CSEEAW have been produced based on the realities of China

A preliminary, complete CSEEAW system has been formed via pilot trial accounting and studies of key techniques

The thematic studies have preliminarily demonstrated a broad horizon for the application of CSEEAW

IV. FOLLOW-UP ACTIVITIES TO INTENSIFY WATER STATICTICAL WORK IN CHINA

Water Resources and Statistical Indicator System for Resources and Environment in China

Collection of Water Service Statistical Data

The First National Water Sector Census

Thanks !
