Question 1: Do you have any comments on the proposed structure of the Classification of Environmental Functions?

Please note that the statistical service of France's ministry of ecology participated to Eurostat's task force that designed the proposed new classification of environmental activities.
We also submitted this proposal to the national Commission on the Economics of Sustainable Development (sub-group on environment) that did not issued any negative statement.
Therefore France supports the so called proposed Classification of Environmental Functions.

Question 2. Do you have any comments on the explanatory notes and on the heading reference?

No comments

Question 3. Do you have any other comments on the Classification of Environmental Functions?
