Question 1: Do you have any comments on the proposed structure of the Classification of Environmental Functions?

One topic I could not find in the proposed structure is adaptation activities to climate change. As these activities are growing, it is important to estimate their share of total environmental expenditure. If it is possible, It would be very useful to specify them as a separate category.

Question 2. Do you have any comments on the explanatory notes and on the heading reference?

no

Question 3. Do you have any other comments on the Classification of Environmental Functions?

no
