Question 1: Do you have any comments on the proposed structure of the Classification of Environmental Functions?

No comment

Question 2. Do you have any comments on the explanatory notes and on the heading reference?

No comment

Question 3. Do you have any other comments on the Classification of Environmental Functions?

NIS Romania appreciates the efforts made for the new structure of the classification of environmental functions.
It is by far clear that this new correspondence will involve allocation of additional resources difficult to attract. No need to say that the environmental statistics team from NIS Romania is overburdened considering the proposal to amendment Regulation no. 691/ 2011 (introduction of 3 new modules)
