Country report Sweden's physical environmental accounts

As the work on Environmental accounting in Sweden is divided between physical and monetary accounts, the National Institute for Economic Research will report on the monetary accounts.

Statistics Sweden

1. Sustainability indicators from environmental accounts including social variables on accidents and sickness by industry (Report in Swedish)
2. Nordic taxes (Eurostat report, [together with Denmark, Norway and Finland](#))
3. Indicators for Integrated Product Policy (Pilot study in Swedish for the Swedish EPA)
4. Water accounts by water districts. Report available at the website
5. Environmental Impact of Swedish Trade. Report at the website
6. Environment industry in Sweden (reports on website)
7. Trade emissions modeling with SEEA data (work in progress)
8. Environmental subsidies (Draft report)
9. Chemical indicators (work in progress)
10. Households and decomposition (work in progress)

Work on creating a website where the data disaggregated by industry and by product group will be available to users, planned for 2004.

Web site for reports :
