

Ecosystem services assessment at catchment scale, learnings from Ireland

1. Introducing INCASE
2. Accounting for services
3. Catchment – challenges?

INCASE

Irish Natural Capital Accounting for Sustainable Environments

SERVICES AND BENEFITS

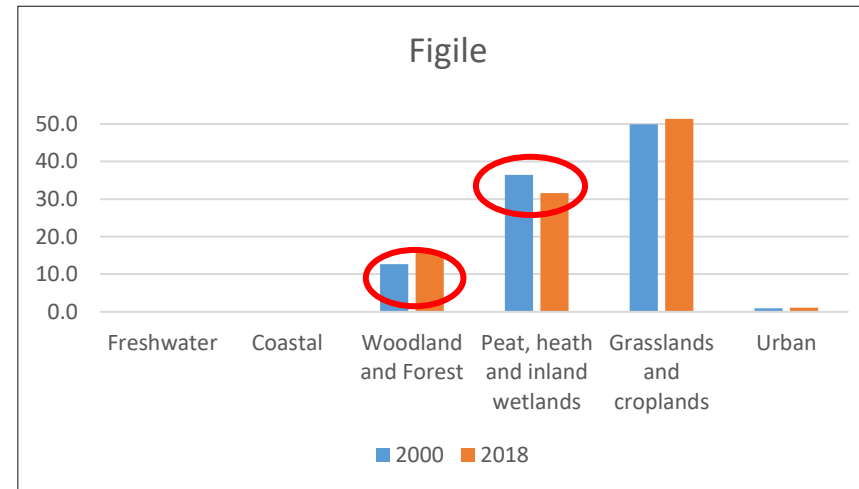

All four catchments

Relevant (attempted!) services

- *Provisioning:*
 - Biomass (crops, grazing, wood)
- *Regulating*
 - Climate
 - Water purification (what to use?)
 - Habitat (nursery)?
- *Cultural:* Recreation
- *Non-use values:* Ecosystem/ biodiversity appreciation
- *Abiotic flows:* Water (supply), Peat (domestic / industrial energy)

Policy linkages / Policy relevance

Three Questions

Where are people?

What are they doing?

Who could lose out?

Population Density (sq km)

FIGILE SUPPLY ACCOUNT: WHAT ECOSYSTEM SUPPLIES WHAT SERVICE (range of data ages)

Summary ES assessment:

- Biomass: area crop/pasture x growth
- Peat: estimated household use; area x estimate extraction.
- Water: demand approach (no data available)
- Climate: land cover + soil type x Tier Efs
- Carbon stock: SIS SOC
- Ecosystem appreciation: area designated

		TOTAL SUPPLY
Supply		
Selected ecosystem serv		
Provisioning services		
Biomass provisioni		13,513
		75,273
		52,658
Peat (abiotic flow)		1,451
		744,634
		907,262
Water supply (abi		
Other provisioning		
Regulating and mainten		
Global climate reg		49,499
Water purificator		?
Water flow regulat		
Nursery populatio		
services		?
Other regulating c		
Cultural services		
Recreation-relate		?
Eco/Geosystem a		318 (1.4%)
Other cultural serv		

FIGILE USE ACCOUNT: work in progress!

Need consistent approach to accounting for services – only as good as the inputs!

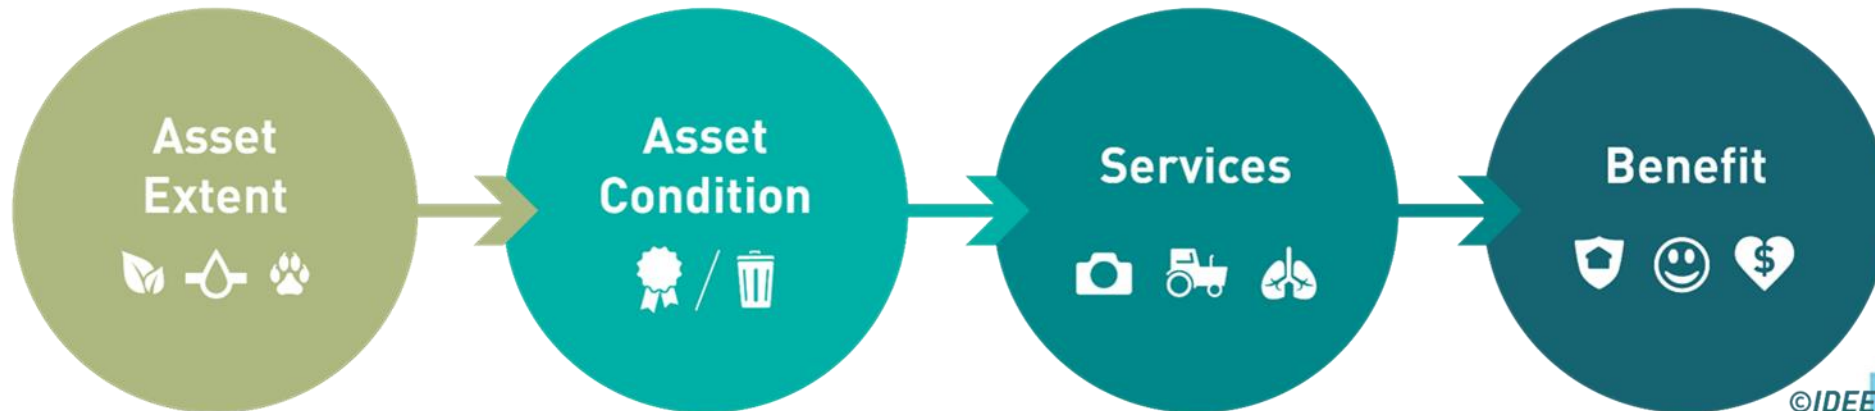

Beneficiaries / Economic Sectors

		A - Agriculture, Forestry and Fishing	B, C - Mining and manufacturing	D - Electricity	E - Water supply	F-H - Construction, wholesale and transportation	I, R - Accommodation and food service, culture, sports and recreation	Other Sectors	Households	Government	Exports
		03 Fishing and aquaculture									
Provisioning	Crop provisioning services (tonnes DM)	13,513									
	Fodder (tonnes DM)	75,273									
	Timber (m3)			52,658							
	Water (Quantity) (m3)	414,042		68,848	424,372		?	?	?		
Provisioning (abiotic)	Peat Turf (tonnes DM)								1,451		
	Peat Milled (tonnes DM)		744,634								
Regulation & Maintenance	Carbon sequestration (tonnes CO2 equiv)									0.05Mt C	
	<i>Flood regulation</i>									?	
	<i>Water (purification)</i>										
Cultural	Recreation (Trips)						?		?		
	Ecosystem appreciation (ha conserved)									318 (1.4%)	

Logic chains: grazed biomass

Policy linkages: CAP Policy and national level rules

Ecosystem type/s	Factors determining supply		Factors determining use	Ecosystem Service		Benefit	Main users and beneficiaries
	Ecological	Societal		Description	Potential physical metric/s for ES		
Grasslands	Type and condition of vegetation; soil type; elevation; weather	Ecosystem management (fertiliser application; stocking density,	Landowners occupation and preferences; market price; subsidies	Biomass for Reared animals and their Outputs	Gross tonnes of grazed biomass	Livestock and livestock products (e.g., meat, milk, eggs, wool) (SNA benefits)	Agricultural producers, including household and subsistence production

Challenges

1. Finding the Data
2. Coverage
3. Resolution and Coordinates
4. Time Series
5. Data Gaps
6. Catchments
