

# Integrating Natural Capital into Sustainable Development Decision-Making in Uganda

*A project funded by the UK Government*

## Integrated Accounting for Land, Soils and Agriculture in Uganda

Steven King (UNEP-WCMC), Moses Masiga (ENRAC, Uganda), Mark Eigenraam (IDEEA), Carl Obst (IDEEA)

27th meeting of the London Group on Environmental Accounting 2021

# Main Findings and Discussion Questions

## Main Findings

- Sequence of integrated set of accounts on the relationship between land use, soil fertility and agricultural production in Uganda
- Demonstrated compilation at subnational scales relevant to the sector and poverty alleviation
- Calculated 8 key indicators to inform sustainable development of the agricultural sector and its impacts on other ecosystems, the services they supply and biodiversity they support

## Discussion Questions

- What are the LG thoughts on the structure of the accounts and tables presented?
- What are the LG thoughts on the aggregates and indicators presented and what other indicators could be derived?
- What other extensions should be considered?
