1 GENERAL COMMENTS

In this section please provide general comments on the draft. You may like to consider providing comments on the style and tone, the structure and organisation, the content and coverage, and the general accessibility of the material.

The way the information is organized in the manual is very interesting, because each accounting module fulfils the role of orienting the user, so it could adapted to the reality of each country.

Regarding the former, and considering that the conditions of the developed countries are very different from those of developing countries, the results may vary greatly, so it is recommended that the national sources be adjusted and specific factors for each country be considered.

2 TECHNICAL AND OTHER COMMENTS

In the box below please supply any additional comments including those of a more technical nature. Please reference your responses with the relevant paragraph numbers or section numbers.
