# Urban ecosystems and urban ecosystem services

- How green are Europe's cities and how do green spaces contribute to delivering urban ecosystem services?
- Two dynamics in the changes in urban green space:
  - ➔ in core cities (parks, trees, lawns)
  - ➔ in functional urban areas: conversion between cropland, artificial land, and semi-natural and natural ecosystems

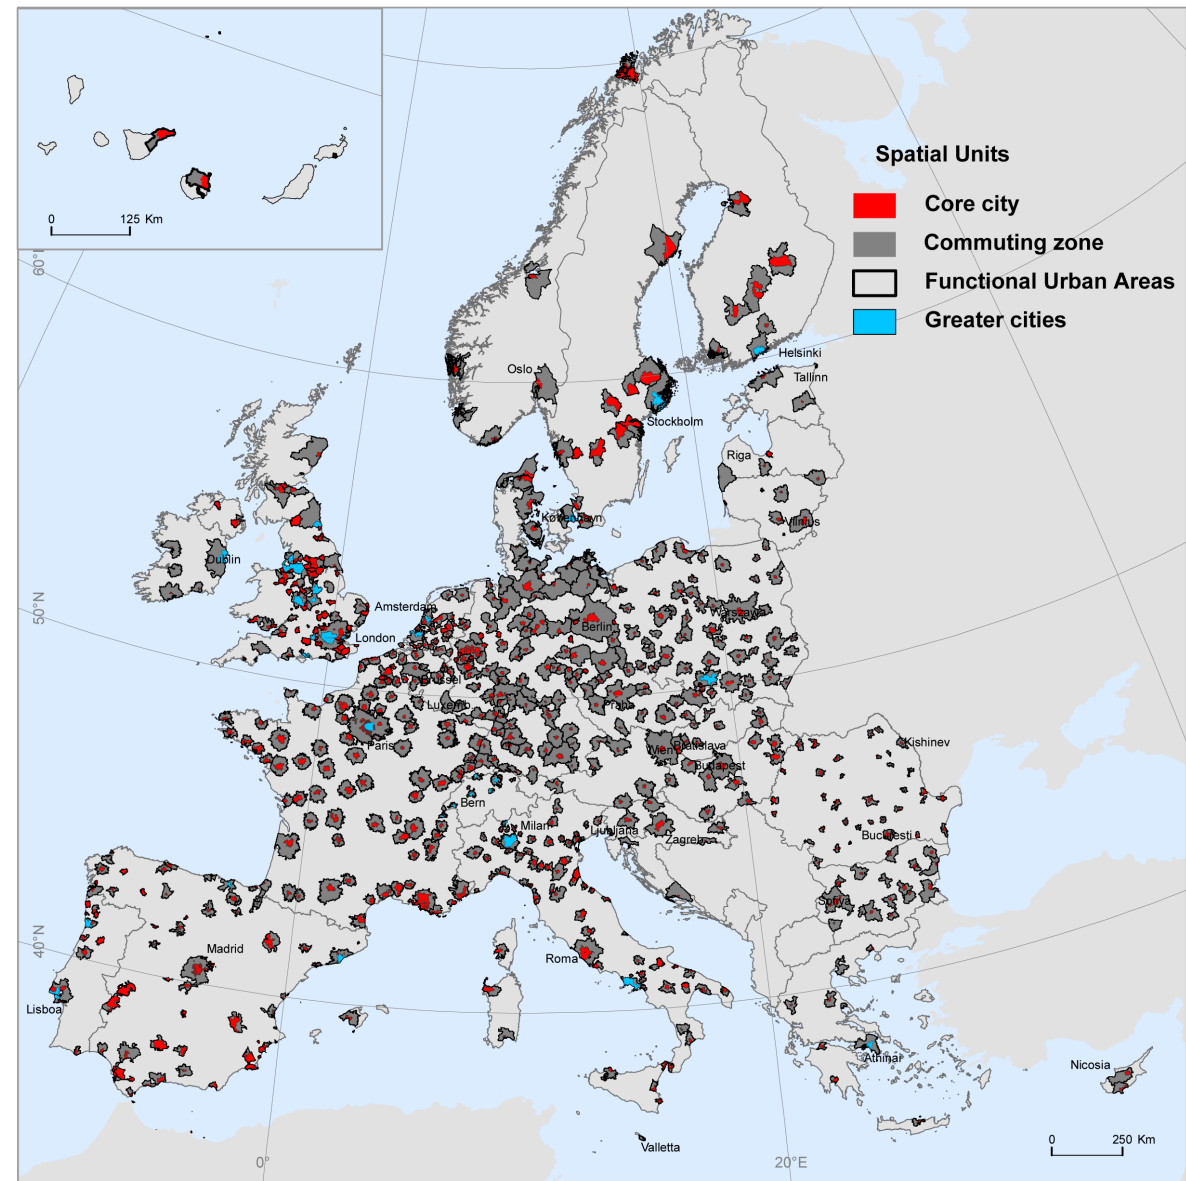

City of Padua, Italy

# Reporting on cities in Europe

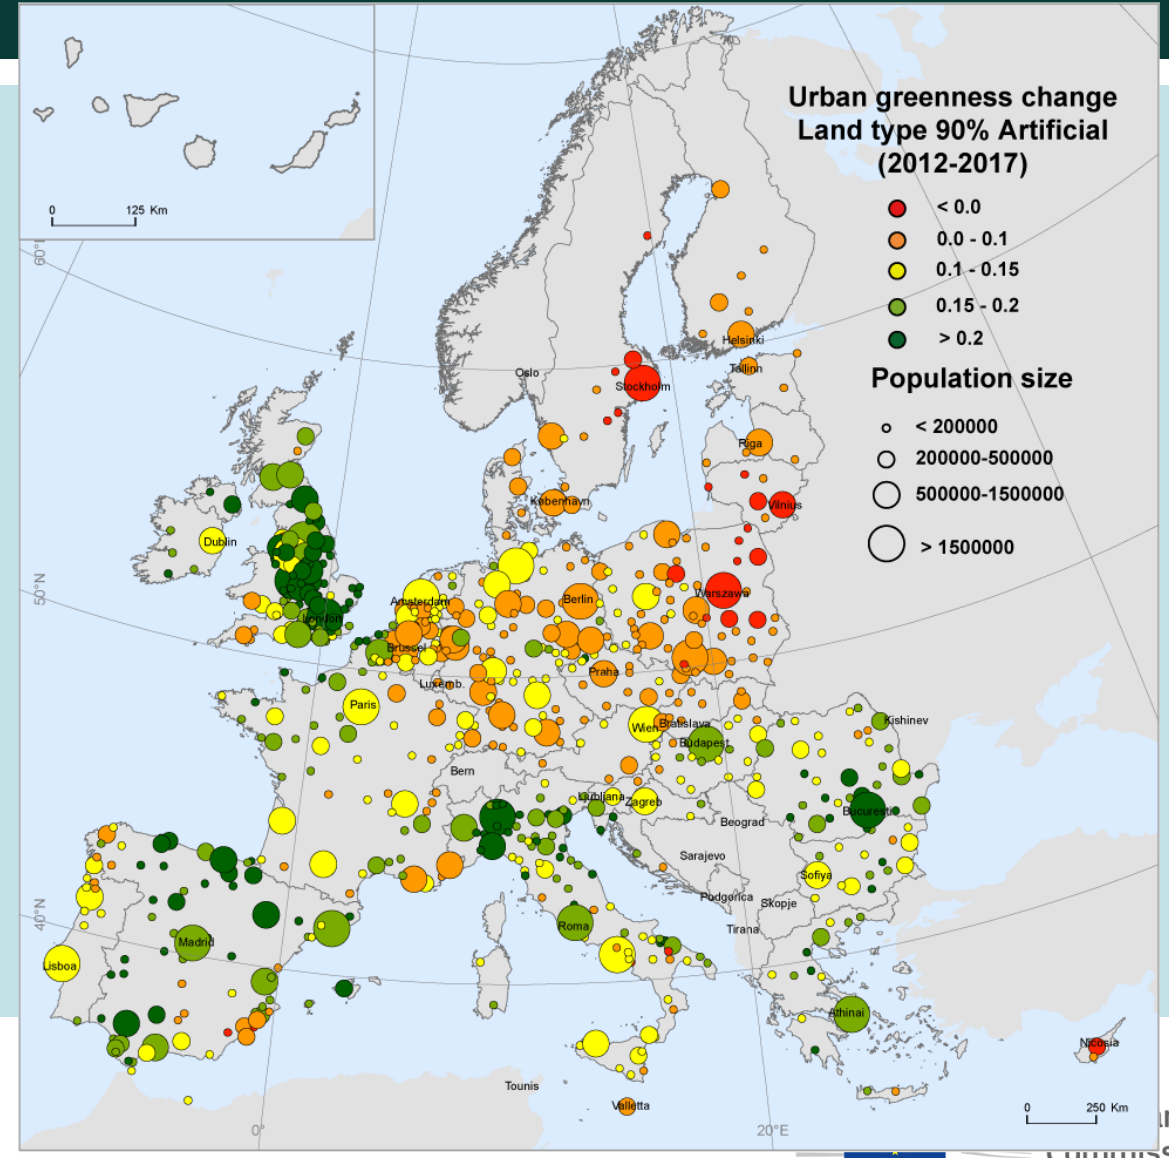

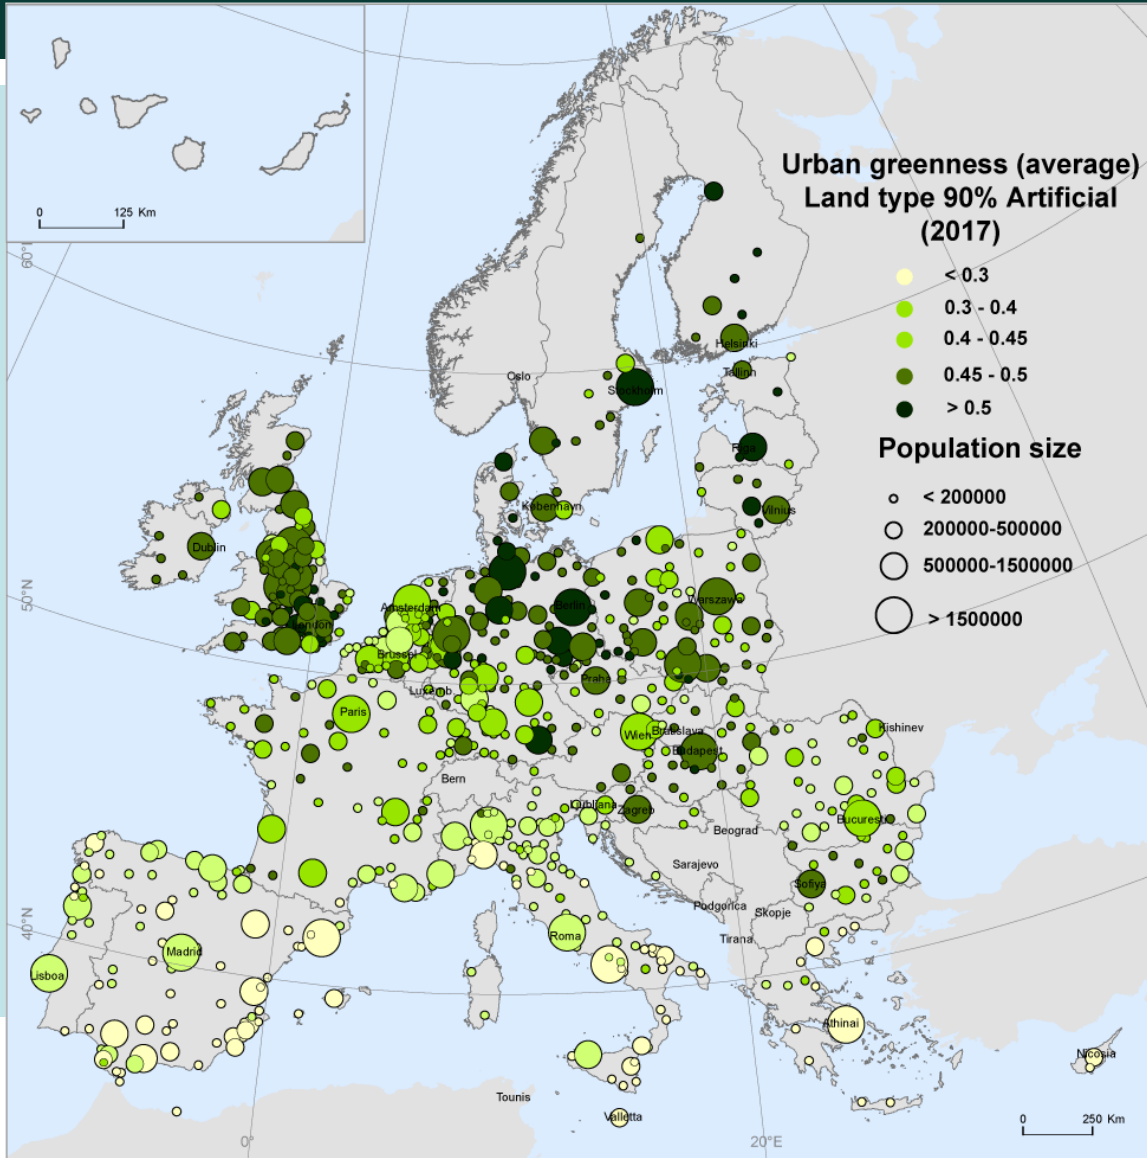

Core cities cover  
3.48 %

Functional urban  
areas cover 20.3 %

# Green in the wider urban environment

- Dominance and prevalence Natural
- Dominance and prevalence Agriculture
- No dominant Land mosaic type
- Dominance and prevalence Artificial

# Ecosystem services in Europe's urban areas

- Two approaches:
- Pan-European mapping of ecosystem services across ecosystem types (including urban) → INCA accounts
- Mapping of ecosystem services inside functional urban areas and core cities
