

Enhancing Data Interoperability through Essential Variables and Biodiversity Observation Networks

SEEA Ecosystem Accounting Expert Forum

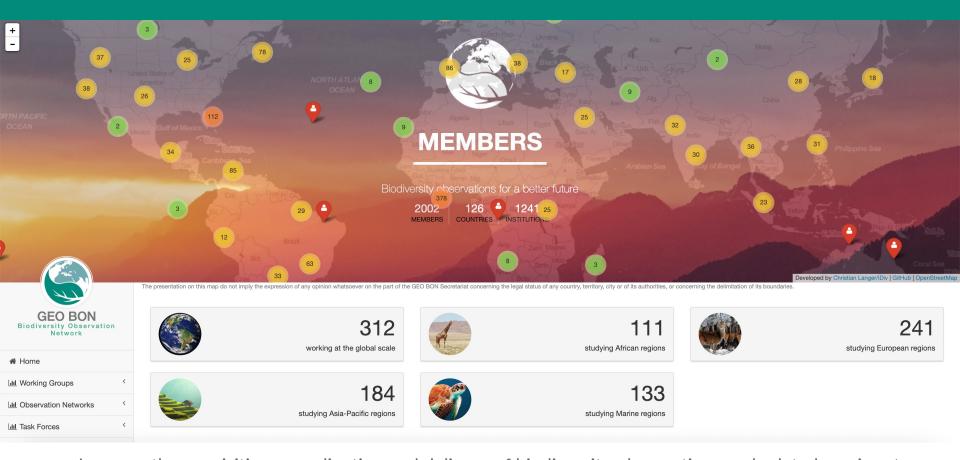

7 December 2021

HyeJin Kim

German Centre for Integrative Biodiversity Research (iDiv)

Global Earth Observations Biodiversity Observation Network

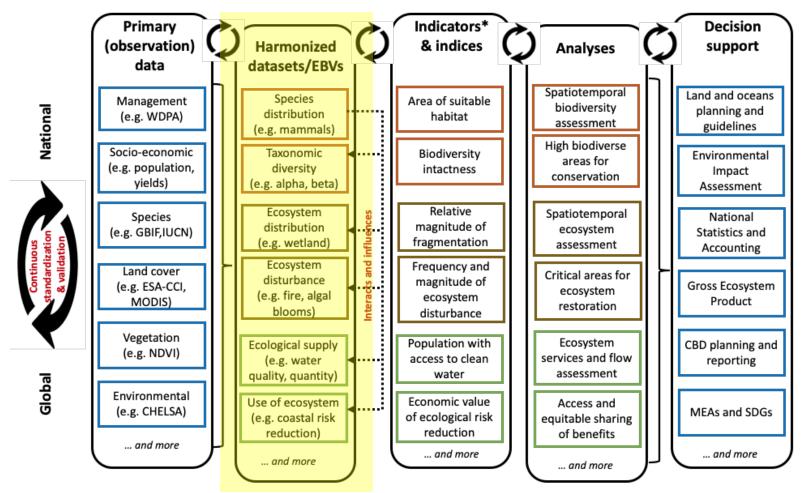

Mission: Improve the acquisition, coordination and delivery of biodiversity observations and related services to users including decision makers and the scientific community.

Vision: A global biodiversity observation network that contributes to effective management policies for the world's biodiversity and ecosystem services.

1. Data to Decision Support Workflow - essential variables, and the role of models & indicators

Kim et al. (n.d.). Interweaving Multi-scale Science and Policy Frameworks for Conservation and Sustainability Implementation. Forthcoming.

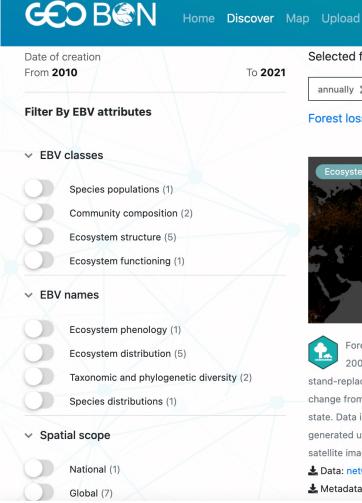

2. SEEA-Ecosystem Accounting and Essential Variables - compatibility of their frameworks (via EO4EA)

SEEA EEA Framework GEOBON EBV Framework			Ecosystem Extent Account	Ecosystem Condition Account								
				Abiotic Ecosystem Characteristics		Biotic Ecosystem Characteristics			Landscape level characteri stics	Leosystem services Account		
Туре	Class	EBVs / EESVs	<u>-</u>	Physical state	chemical state	Compositi onal state	Structural state	Functional state	Landscape and Seascape	Provisioning	Regulating	Cultural
EBV	Species Populations	Species distribution				Х		Х				Х
EBV	Species Populations	Population abundance				Х		Х				Х
EBV	Community Composition	Taxonomic diversity				Х						
EBV	Community Composition	Phylogenetic diversity				Х						
EBV	Community Composition	Multi-trophic interaction diversity				Х						
EBV	Community Composition	Biomass distribution					Х					
EBV	Ecosystem Structure	Ecosystem distribution	х									
EBV	Ecosystem Structure	Ecosystem live cover					Х					
EBV	Ecosystem Structure	Ecosystem vertical profile					Х					
EBV	Ecosystem Functions	Disturbance						Х				
EBV	Ecosystem Functions	Ecosystem phenology						х				
EBV	Ecosystem Functions	Net primary productivity						Х				
EBV	Ecosystem Functions	Secondary productivity						Х				
EESV	Ecosystem Services	Ecological supply		Х	Х					Х	Х	
EESV	Ecosystem Services	Anthropological contribution								Х		
EESV	Ecosystem Services	Demand										
EESV	Ecosystem Services	Use								х	х	Х

3. EBV Data Portal - essential variables in NetCDF with metadata
