

Social issues in the SEEA framework

Group of ten people in six countries
(UK, Germany, Denmark, Canada,
Australia, Sweden) plus UN

Draft report

Aim

- To make an inventory of some different approaches for adding social aspects to the environmental accounts and briefly reflect on how these can be integrated in the SEEA framework.

Why include social aspects?

- Sustainability issues, complementing or integrating the data sets
- Health and work environment can be seen as part of environment

Inventory

- Socio-economic aspects (4 studies)
- Socio-environmental aspects (3 studies)
- Other social aspects, Social capital (3 studies)

What next?

- The draft report will be finalised
- Comments on the report are welcome
- More people interested to participate?
- Siena group report on Social capital
