GEOSPATIAL TOOLS IN THE ASSESSMENT OF ES

- Ecosystem services are produced by organisms (Ecosystem Service Providers) & their activities (Ecological processes and functions) which are invariably related to the physical environment – Ecosystem
- There are several drivers of change affecting the ecosystems, ecological processes, organisms and hence the ecosystem services
- Mapping of the ESPs, habitats, ecosystem, landscape, watershed based on bio-physical variables
- Monitoring at various spatial and temporal resolutions – tracing the drivers of change

Utility

- Identification of degraded lands for improving productivity
- Reclamation of degraded lands
- Monitoring of degraded lands
- Prioritization of watersheds for treatment
- Environmental studies

National Wastelands Mapping

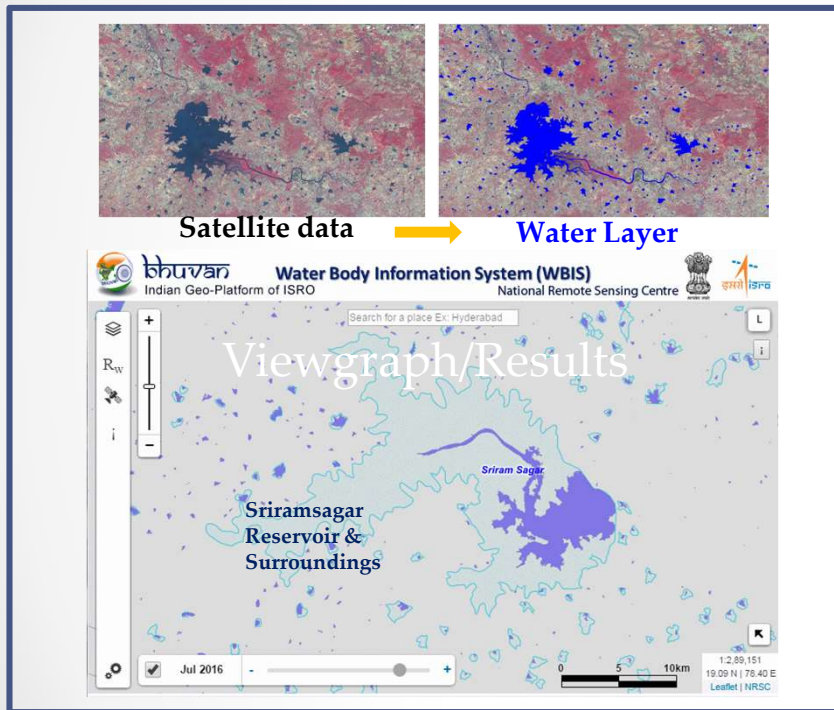

- ❖ Wasteland mapping 1982-1984 1:1M
- ❖ Wastelands Inventory on 1:50K: 1986-2000 + 2003-2004
- ❖ Monitoring of Wasteland on 1 : 50K: 2005-2006 & 2008-09
- ❖ Wasteland Change Analysis 2014-2015 - to be initiated
- ❖ Methodology
 - First 3 cycles created using visual methods using single season (rabi) data
 - 3rd and 4th cycles adopting on-screen method and using 3 season data. Change analysis carried out.
 - 5th cycle will be done using web based approach

Users: Ministries – MRD, Power, Agriculture, MoUD etc., for greening, agriculture, plantation, watershed development; industrial & infrastructure development etc.

Water Bodies Information System (WBIS)

- Surface Water bodies dynamics for the entire country derived from multi-sensor satellite data and hosted on a Web enabled Water Bodies Information System (WBIS)

- *Satellite data is processed in Automatic Chain in Near Real Time*
- *Surface Water bodies dynamics is provided through Water Bodies Information System (WBIS) and Bhuvan*
- *Visualisation & Analytics provided for at Individual water body & Region level*
- *Water Bodies are monitored*
 - Once in 5 Days (for size > 50Ha)*
 - Once in a Month (for size > 2 Ha)*
 - Once in a Season (for size > 0.25Ha)*

- ✓ **Surface water bodies information is useful for State & Central Irrigation Departments for : 1) Pre & Post Monsoon scenario (2) Sustainability Analysis : Inland fisheries (3) Hydrological Drought Assessment and (4) Surface Storage Quantification**

Monitoring and Evaluation of IWMP Watersheds using Geospatial Technologies

Study Area

- IWMP watersheds in Entire India

Total Micro-watersheds covered : ~75000

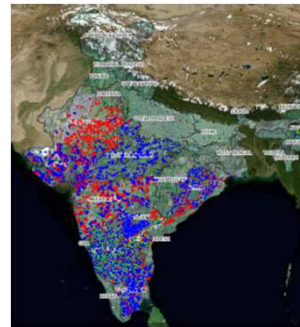

Srishti : Web GIS using IRS High Resolution image base for monitoring and evaluation

Drishti : Android Application for Real time Field inventory and uploading to server using Geo-tagged Photo

Budget : IWMP – Rs 35.03 Cr Duration : 2015-16 to 2020

User: Dept of Land Resources, Min of Rural Development

Srishti

About IWMP
The main objectives of the IWMP are to restore the ecological balance by harnessing, conserving and developing degraded natural resource such as soil, vegetative cover and water. The outcomes are prevention of soil run-off, regeneration of natural vegetation, rain water harvesting and recharging of the ground water table.

Bhuvan IWMP-SRISHTI: Monitoring and Evaluation
A Web based GIS application (Geoportal) enabling the monitoring and evaluation of IWMP watersheds, using satellite remote sensing and sample field data using mobile smart phone applications has been realised. This Geoportal facilitates M&E of all IWMP watersheds for 16 states and 50 special watersheds in 16 states.

Salient Features
The geoportal enables image and map display, monitoring tools, summary statistics of all the IWMP watersheds. The application enables National, State, District and watershed level access for information and report generation.

G-Governance Applications

An abstract landscape painting with a soft, hazy atmosphere. The color palette is dominated by muted blues, greens, and earthy browns, with some warmer tones like orange and yellow. The brushstrokes are visible and expressive, creating a sense of movement and depth. The overall mood is serene and contemplative. The text 'THANK YOU' is centered in a bold, blue, sans-serif font.

THANK YOU
