Working methods

21st meeting of the UNCEEA
15, 17, 18 June 2026

United Nations

Context

19th UNCEEA meeting in 2024

- Supported the Bureau's plans for the Operational Guidelines, suggesting that, to enhance transparency, the procedures for determining membership be clarified in the document, and noted that the composition of the working groups and technical committees should be posted on the SEEA website.
- The UNCEEA Bureau discussed a draft note on the working methods prepared by the Task team on the Mandate and Governance at its meeting in October 2024
- In the meantime, we received requests for the ToR of the various UNCEEA working groups and Technical Committees

- It is proposed that the Working methods and ToRs are reviewed, and updated as necessary, at the same time
- Once reviewed by the Bureau, they will be submitted to the UNCEEA at its next meeting in 2027
- After finalization, they will be made available online together with the working groups' membership

The Committee is invited to express its view on this proposal
